Mission

AJSLP publishes peer-reviewed research and other scholarly articles on all aspects of clinical practice in speech-language pathology. The journal is an international outlet for clinical research pertaining to screening, detection, diagnosis, management, and outcomes of communication and swallowing disorders across the lifespan as well as the etiologies and characteristics of these disorders. Because of its clinical orientation, the journal disseminates research findings applicable to diverse aspects of clinical practice in speech-language pathology. AJSLP seeks to advance evidence-based practice by disseminating the results of new studies as well as providing a forum for critical reviews and meta-analyses of previously published work.

Scope

The broad field of speech-language pathology, including aphasia; apraxia of speech and childhood apraxia of speech; aural rehabilitation; augmentative and alternative communication; cognitive impairment; craniofacial disorders; dysarthria; fluency disorders; language disorders in children; speech sound disorders; swallowing, dysphagia, and feeding disorders; and voice disorders.

Impact Factor

AJSLP is indexed in the Science Citation Index Expanded (SCIE) in the categories Audiology & Speech-Language Pathology and Rehabilitation, and in the Social Science Citation Index (SSCI) in the categories Rehabilitation and Linguistics. The 2020 Journal Impact Factor™ is 2.408, and the 5-year figure is 2.694 (Source: Clarivate, 2021).
